Jiří Gregor – Commission C1

Biography

Jiří Gregor is a pharmacist at the Tissue Bank of the University Hospital Hradec Králové, Czech Republic. He received his Ph.D. in Bioorganic Chemistry from Charles University in Prague in 2001, focusing on the synthesis of antituberculotics, and earned his Mgr. degree from the same institution in 1996.

He specializes in the cryopreservation of cells and tissues for clinical applications, cold-chain management in the distribution of advanced therapy medicinal products, and CAR T cell therapies in haemato-oncology.

He is a member of the Czech National Committee for Cooperation with the IIR and serves on the Organizing Committee for Cryogenics
