

13th International Conference on Compressors and their Systems

11th – 13th September 2023 at City, University of London

REGISTER NOW

Early bird tickets
Until 6th August 2023

This conference provides a forum where developments in air, gas and refrigeration compressors, vacuum pumps, expanders, related systems and components will be discussed. The program will contain keynote addresses, panel discussions, high quality research and technical papers, podium presentations, industry sessions with topics of high importance as well as forums and informal discussions.

Conference theme. Compressors and Expanders in Future Energy Systems

Who should attend? Manufacturers and designers of compressors, expanders, their systems and control systems, suppliers, end users, researchers and research organisations, academics, educational institutions.

The conference will be preceded by the **6th Short course on Computation Fluid Dynamics in Rotary Positive Displacement Machines**, taking place on 9th-10th September. This course is dedicated to advanced topics of modelling, analysis, and the design of Positive Displacement Machines for industrial and research use.

We look forward to welcoming you to London in September!
